EXPERIENCE

Extended Content Solutions, London — *IT Consultant*

May 2014 - PRESENT

Key member of the enterprise search technologies team with a focus on the Google Search Appliance (GSA). Achieved the Certified GSA Deployment Specialist qualification in addition to completing a number of successful deployments within a short number of months. Managed Google for Work training and development across the enterprise team, which increased expertise and delivery of search projects.

Responsibilities include every aspect of a project's life, including: Pre-sales, proposal documentation, requirements gathering, deployment management, GSA development, testing and support.

GSA development includes: System installation & configuration, Front End XSLT customisations, Search integration with web applications, Connector development and deployment, and Google Analytics integration.

Amazon UK, London

October 2013 - Jan 2014

Temporary contract with responsibilities in the inventory department.
